GOAL & LIFE COACH AGENT

Member 4: Long-Term Goal Alignment & Behavioral Accountability Engine

AGENT 4 OF 5

1. AGENT OVERVIEW & CORE PURPOSE

While the Planning Agent focuses on *what to do and when*, the **Goal & Life Coach Agent** focuses on *why the user is doing it and how to sustain consistency*. It manages long-term goal decomposition, conducts motivational check-ins, tracks habit retention, and resolves psychological friction like burnouts or avoidance.

Primary Objective

Decompose high-level long-term goals into actionable milestones, conduct daily reflections, and sustain user engagement.

Behavioral Accountability

Identifies cognitive roadblocks, drives reflective dialogue, and triggers gamification rewards (streaks, achievements).

2. UNIVERSAL SYSTEM DATA SCHEMA CONTEXT

The Goal & Life Coach Agent manages the `goals_data` block and monitors behavioral indicators in `adaptive_model`:

```
{ "goals_data": { "career_goals": [ { "goal_id": "G10", "title": "Get AI Internship", "target_date": "2027-06-01" } ], "milestones": [ { "id": "M1", "goal_id": "G10", "title": "Complete ML Basics", "status": "in_progress" } ], "habits": [ { "name": "Daily Code", "streak": 12, "last_completed": "2026-10-03" } ] }, "adaptive_model": { "motivation_index": 0.82, "burnout_risk_score": "Medium" } }
```

3. INPUT & OUTPUT SPECIFICATION

Type	Input Sources / Formats	Outputs / Artifacts Produced
Data Payload	• User natural language goals & ambitions • Qualitative user reflection logs • Goal completion metrics	• Milestone roadmaps & breakdown tasks • Empathetic coaching interventions & reflection prompts • Habit updates & streak badges
Control Signals	• Behavioral risk flags (e.g., missed 3 consecutive goals) sent from **Adaptive Manager**	• Strategy adjustment requests sent to Adaptive Manager to revise user targets

4. INTERNAL COACHING & REFLECTION FLOW

The Goal & Life Coach Agent processes user engagement through a structured motivational loop:

1. **Goal Decomposition:** Maps macro ambitions into actionable sub-milestones using SMART criteria.
2. **Daily Reflection Dialogue:** Prompts the user for end-of-day reflections to capture qualitative friction.
3. **Behavioral Analysis:** Evaluates mood and task avoidance signals to detect early burnout signs.
4. **Intervention Trigger:** Emits coaching dialog or executes `update_goal_strategy()` tool calls.

5. INTER-AGENT WORKFLOW & INTEGRATION ARCHITECTURE

The Goal & Life Coach Agent serves as the human-centered, motivational bridge of the system:

Inbound Interactions

- **Adaptive Manager:** Sends alert when user's execution pattern shows chronic procrastination.
- **Planning Agent:** Supplies real-time milestone completion status.

Outbound Interactions

- **Personal Planning Agent:** Sends newly decomposed milestones to be converted into schedule tasks.
- **Adaptive Manager:** Requests systemic strategy adjustments when user goals change.

6. DETAILED AGENT COMMUNICATION MATRIX

Target Agent	Data Shared / Received	Trigger Condition / Purpose
Personal Planning Agent	Decomposed Milestones & Micro-Tasks	Dispatched whenever a new goal is initialized or updated by the user.
Adaptive Manager	Qualitative Sentiment & Burnout Risk Index	Sent post-reflection session to inform global system re-balancing.
AI Tutor Agent	Relevance Context Tags	Provides real-world application context for abstract academic topics to boost user engagement.

7. VALUE PROPOSITION & SYSTEM IMPACT

The Goal & Life Coach Agent turns short-term task execution into long-term behavioral change:

- **Sustained Consistency:** Maintains user momentum using habit tracking and gamified achievement loops.
- **Empathic Problem Solving:** Addresses non-academic friction, such as motivation loss and goal misalignment, through natural language coaching dialogues.
- **Purpose Alignment:** Connects daily study tasks to career ambitions, keeping the student engaged over long durations.
